

# UNIT OVERVIEW & LEARNING JOURNEY

## YEAR 7 – COMPUTING: TERM 2

**AUDIENCE & PURPOSE – Create products that have impact**

### OVERALL LEARNING JOURNEY FOR KEY STAGE 3 COMPUTING

In this unit students will master Microsoft PowerPoint and use all the functions available to create outstanding presentations that are fit for purpose and suited to their audience.

#### Aim of this unit:

This unit will take the whole of this term to complete. Topics students will cover:

- Acceptable Use Policy
- Revisit E-Safety
- Templates and consistency
- Purpose
- Target audience
- Multimedia
- Evaluation in relation to audience and purpose

They will use the skills learnt across the unit to create a presentation about a real-world cause that they would like to gain support for.

#### Assessment:

Most lessons contain multiple choice questions for students to work through, individually and as a whole class that cover the topics for that lesson. There are also independent tasks for students to complete which their class teacher will mark and add to their exercise book.

At the end of this unit there will be a 40-minute exam on all the topics covered this term.

This test, as well as the skills demonstrated on the presentation will determine their final grade for this unit.

#### Homework:

Each fortnight students will receive at least one homework, for which they should only spend 20 minutes completing. These will be a combination of written, research, investigative tasks.

#### How you can help:

Encourage your child to work on their PowerPoint presentation when they have time and to look back on their notes for this topic to help in the final exam.
